FIND OUT MORE...

We resolve corporate issues, marital concerns and legal matters. With 15 years experience we know to expect the unexpected.

There's a solution to every problem and we will work with you to find the right way to get there. We don't use illegal practices such as phone hacking. Instead legitimate skills - computer forensics, surveillance etc - will find the solution

Our Detectives are innovative. Surveillance, computer forensics, database research and undercover operations are supported by in-house fingerprinting, an eye in the sky and covert cameras.
